The School Games aims to provide every child with a positive experience in an environment where the young person's motivation, competence and confidence are at the centre of the competition.

Selection: Think about your young people first – who in your school needs the benefits of competition the most to support their personal development? Through creating a supportive environment that focuses on the process as opposed to final standings or who lifts the trophy, teachers, parents, and peers can help a young person to understand and perceive an experience to be positive or negative.

Competition Key

ENGAGE

These events target pupils who would benefit from either being more physically active, to foster social connections, improve fundamental skills, motivation and confidence or struggle to access competitive opportunities. They are focused on having fun and learning new skills.

DEVELOP

These events are for pupils who have limited experience of the sport and would benefit from developing their skills in a friendly competition. Focus is on supporting a pupil's wider development and not on winning and losing.

COMPETE

These events are for pupils who are competitive in nature and enjoy performing and competing against others. They are open to pupils of all abilities and the focus will always be on developing the whole pupil and having fun but in a competitive environment.

The funding received is utilised to meet the salary of the School Games Organiser over 2.5 days and does not cover all the essential delivery costs incurred. It is our ambition to provide these competitions in the most cost effective way possible and will only ever pass on costs actually incurred e.g., hire of a venue, medals, referees etc. Which is why we have introduced a £30 entry fee per school per competition. This is a cost that can be paid using your Sports premium funding and meets all 5 indicators.
